Frameworks:	Laravel, CodeIgniter, Vue.js, React JS, Next.js, Node.js
WordPress:	Custom Plugin Development, Elementor, Divi, WooCommerce, mu-plugins, Theme Customization
Tools:	Docker, Git, MySQL, NetSuite (SuiteScript), Apache
Modern Web:	Tailwind CSS, Bootstrap, jQuery, Axios
Automation:	FlutterFlow, Make.com, GHL (GoHighLevel)

PROFESSIONAL EXPERIENCE

Fullstack Developer | [Empleado Staffing Solutions](#)

March 2026 – May 2026

Freelance · Remote

- Led an architectural rebuild of a **platform synchronization plugin** with robust product mapping and duplicate prevention.
- Engineered a **custom shipping label upload system** with pre-checkout selection flow, resolving conflicts with third-party express payment gateways.
- Developed an **automated product creation tool** for e-commerce vendors, supporting complex variation templates and real-time stock management.
- Built **custom mu-plugins** to extend **WordPress store locator** functionality with dynamic external link integrations and UI/UX auto-scroll behavior.
- Resolved critical bugs in time zone handling for countdown timers and filter priority conflicts in navigation menus.
- Developed custom locator functionality and integrated signup forms with a rebranded administrative interface.

Fullstack Developer | [Ideahub Solutions Inc.](#)

July 2024 – November 2025

Fulltime · Remote

- Developed a comprehensive **Car Dealership Management System** for the USA market using **PHP/Laravel** and Vue.js with Tailwind CSS.
- Architected a localized supermarket E-commerce platform for Davao with a custom points-redemption and loyalty program using **WordPress and WooCommerce**.
- Built and integrated **RESTful APIs** for responsive, user-friendly features across web and mobile platforms.
- Managed WordPress frontend and backend development including creation of specialized **custom plugins**.
- Utilized FlutterFlow for mobile prototyping and Make.com, GHL for CRM workflow automation.
- Managed full SDLC including rigorous QA testing and server deployment.

Back-End Developer | [Baytech BPO Corporation](#)

February 2024 – April 2024

Fulltime · Onsite

- Developed backend solutions using **CodeIgniter** and integrated features within **WordPress** and **Shopify** environments.
- Built responsive UI components using **React.js** and **Tailwind CSS**.
- Collaborated on technical implementations across diverse CMS platforms to meet client requirements.

Web Developer | [Dinoland SM North Edsa](#)

October 2023 – October 2024

Freelance · Remote

- Developed a comprehensive amusement park ticketing and monitoring system using **Laravel**.
- Integrated a centralized management dashboard with physical kiosk functionality for onsite operations.
- Implemented seamless user experiences using HTML5, CSS3, and JavaScript; managed full SDLC through QA and deployment.

Technical Consultant II | [Cloudtech ERP](#)

October 2022 – October 2023

Fulltime · Hybrid

- Customized **SuiteScript** solutions to automate complex business workflows and enhance **NetSuite ERP** functionality.
- Developed sophisticated reporting and document layouts using **Advanced PDF/HTML templates**.
- Integrated ERP customizations with third-party applications to streamline data synchronization.
- Performed rigorous debugging and testing to ensure accuracy and reliability of system modifications.

ISA II – Web Developer | [DOST-PCIEERD](#)

November 2021 – October 2022

Fulltime · Remote

- Developed a government job portal using **Laravel**, **Tailwind CSS**, and **MySQL**.
- Engineered core features: job posting modules, multi-level approval workflows, and administrative dashboards.
- Ensured strict security and privacy compliance; managed full SDLC through QA and server deployment.

ISA I – Web Developer | [Philippine Statistics Authority](#)

March 2021 – November 2021

Fulltime · Onsite

- Spearheaded a statistical web application for International Merchandise Trade Statistics using **CodeIgniter** and **Vue.js**.
- Developed a robust data entry module to streamline information processing for official records.
- Conducted QA testing on reporting modules and data visualization features to ensure statistical integrity.

Computer Programmer | [Philippine Christian University](#)

October 2017 – March 2021

Fulltime · Onsite

- Maintained the official university website built on **WordPress** ensuring high availability and content accuracy.
- Developed a custom Student Information System for the Guidance Office using **Laravel** and **MySQL**.
- Built a Faculty Information System for Senior High School using **Laravel**, Tailwind CSS, and Bootstrap.
- Developed a COVID-19 Building Entry Tracking System using **Laravel** to enhance campus safety protocols.
- Managed the ID Production department including photo editing and digital asset workflows.

INDEPENDENT & COMMUNITY PROJECTS

Web Developer | [Church of God Dasmariñas](#)

February 2021 – Present

Volunteer · Remote

- Develop and maintain church management applications using **PHP/Laravel** and **CodeIgniter**.
- Engineered a **QR Code Scanner** system for real-time attendance monitoring and automated Meal Stub verification.
- Maintained and extended an Online Reservation System and developed an Online Finance System using **Laravel**.
- Provide ongoing bug fixes and technical support for internal administrative platforms.

Web Developer | [Dianoia Tech](#)

April 2024 – May 2024

Trainee · Remote

- Developed a coffee shop **food delivery web application** enabling direct-to-consumer ordering and logistics.
- Built high-performance UI using **TypeScript**, **React**, and **Next.js** following clean architecture principles.

EDUCATION

Bachelor of Science in Information Technology

Mindoro State College of Agriculture and Technology • 2017
